

REFERENCE PROJECT

Pig breeding and fattening complex "Pulkovskij" Russia, St. Petersburg Region

Project description

Complete equipment including housing, flooring, manure removal, feeding, ventilation and heating systems.

One farm for piglet production: 2520 sows

Feeding technology in use:

- Service centre and gilt breeding with dry feeding
- Gestation: Compident electronic sow feeding
- Farrowing: Liquimix liquid feeding
- Weaner: Spotmix multi-phase feeding

Two fattening houses with a total of 37.700 fattening places

Feeding technology in use: Liquimix liquid feeding

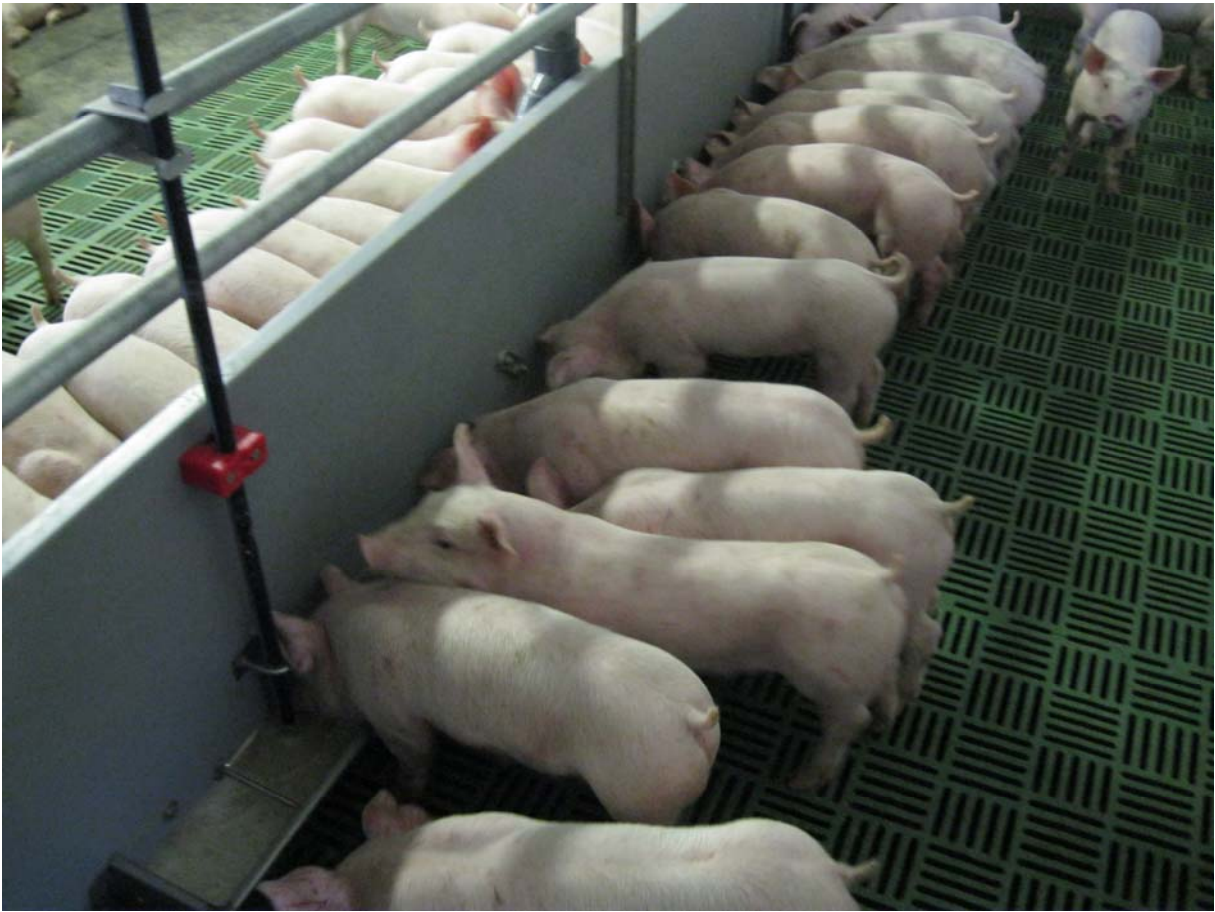

Fattening facility for nearly 20.000 fattening places with central feeding kitchen and liquid feeding for 20.000 pigs

Best care and feed cost savings with Liquimix liquid feeding from Schauer

Easy sow insemination procedure due to the convenient for insemination individual stalls even for 2520 sow farm

Spotmix multi-phase feeding provides the rearing piglets with a daily adapted feed mix in the best way
